

Solar Cycle Update

Prepared by:
O. C. St. Cyr (NASA-GSFC) & H. Xie (CUA)

*with a few additions by
J.B. Gurman*

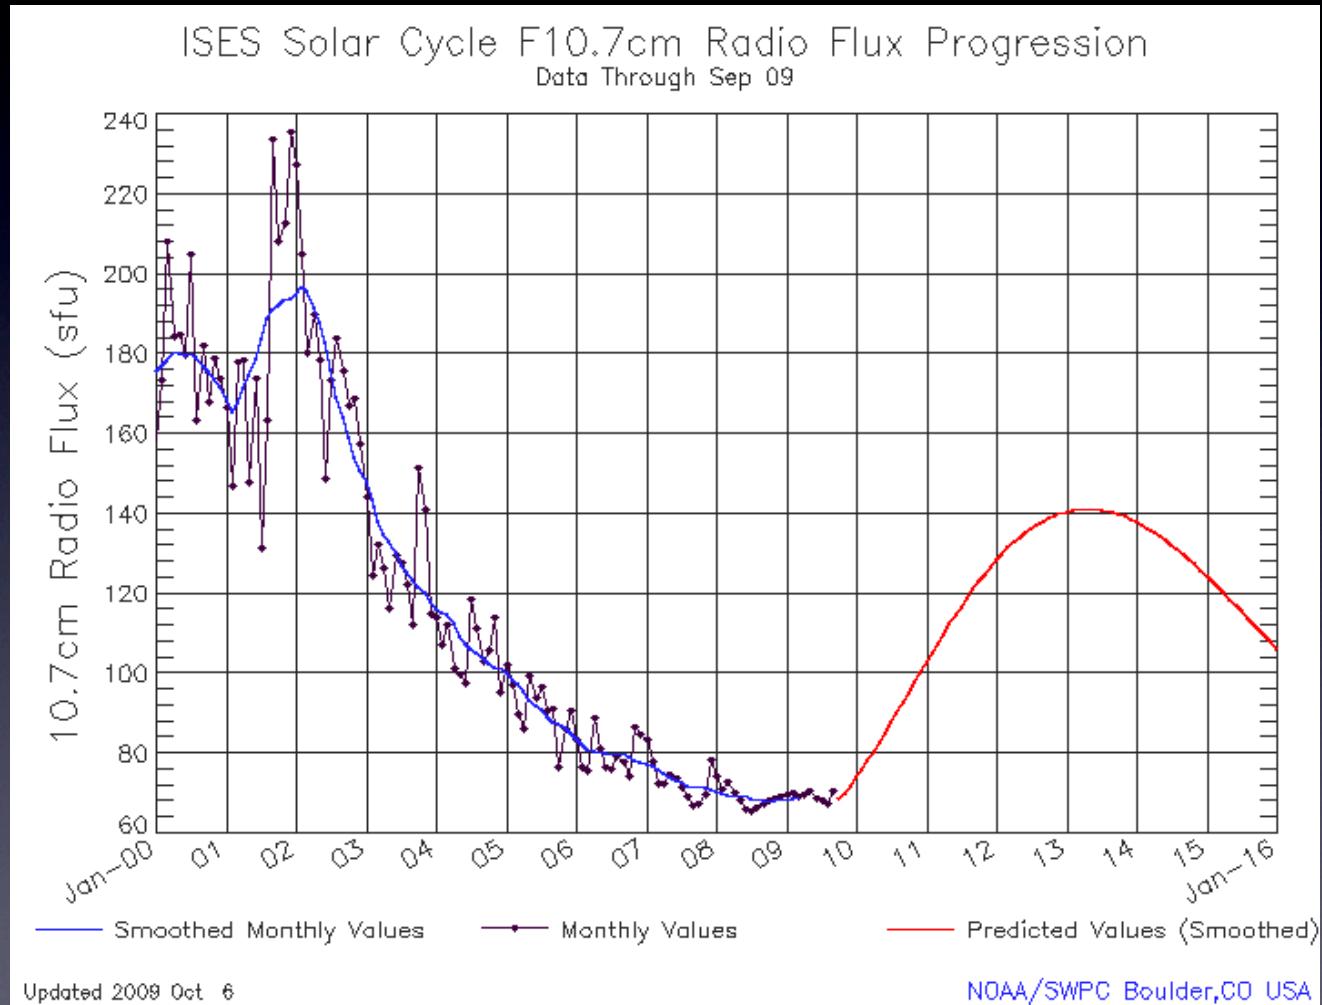

The Official NOAA Viewpoint (2009 January)

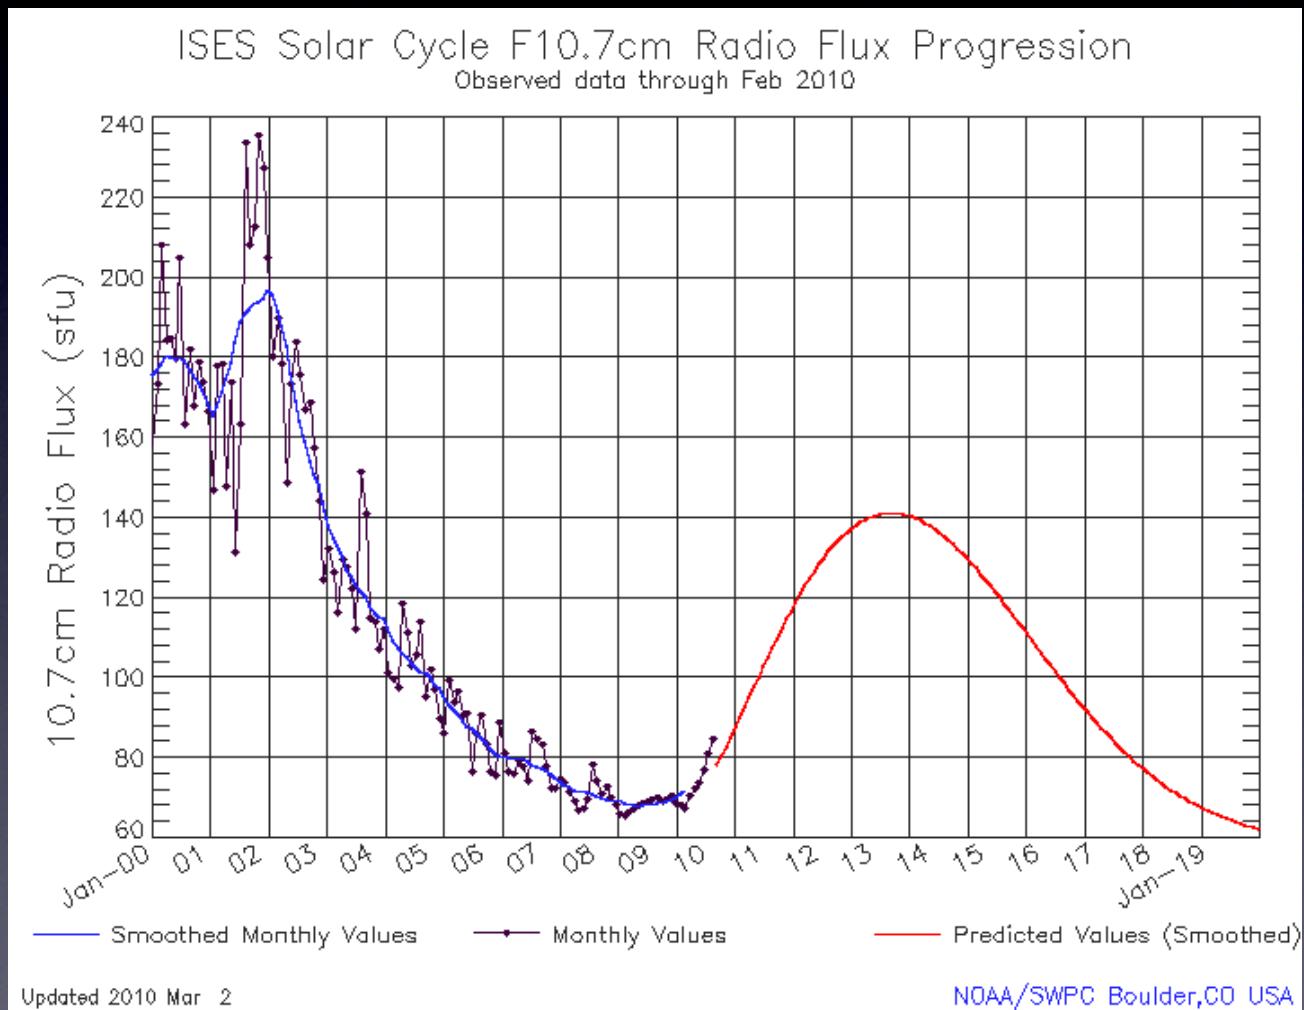

The Official NOAA Viewpoint (2009 September)

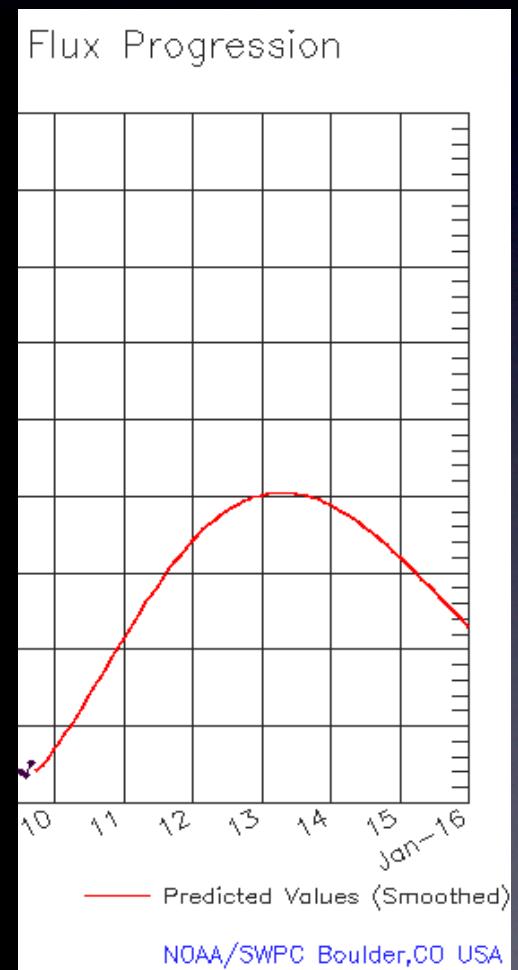

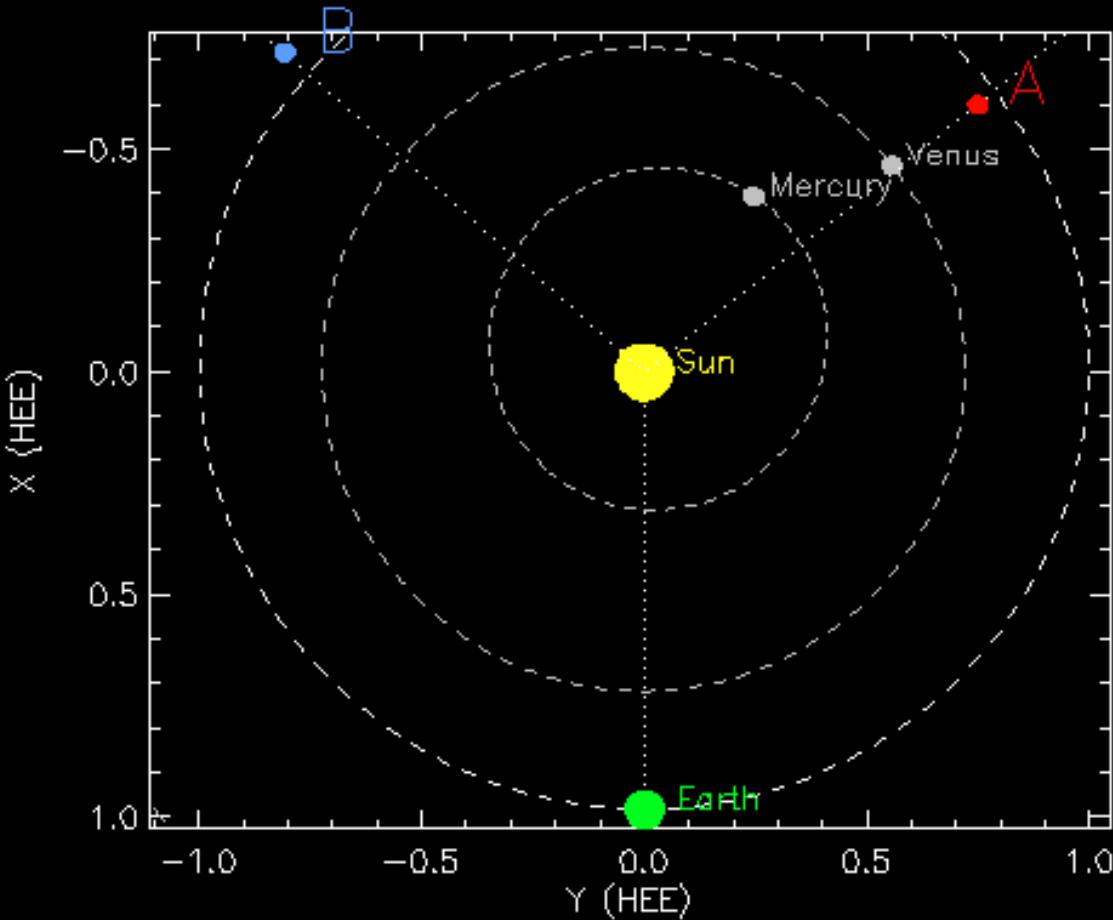

The Official NOAA Viewpoint (2010 March)

Where are STEREO? (2013 January I)

<http://cor1.gsfc.nasa.gov/>

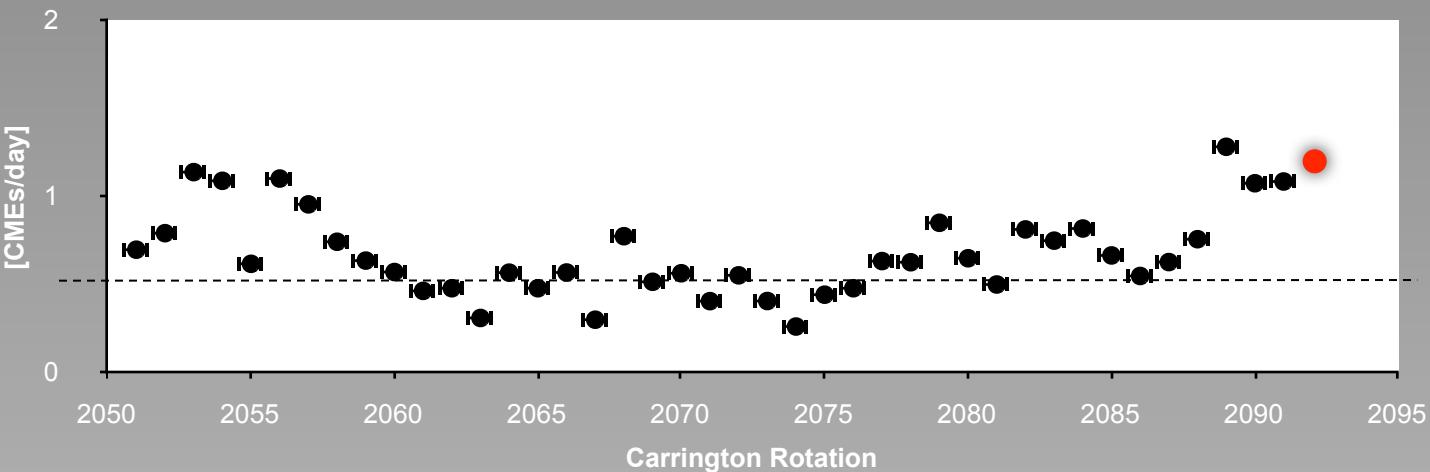

Preliminary CME Catalog

St. Cyr (2007 January - August)

Hong Xie (2007 September - 2008 September)

St. Cyr (2008 October - 2010 January)

STEREO COR1 Preliminary CME Rate (12-Dec-2006 -to- 03-Jan-2010) [1,059 days ==>577 CMEs]

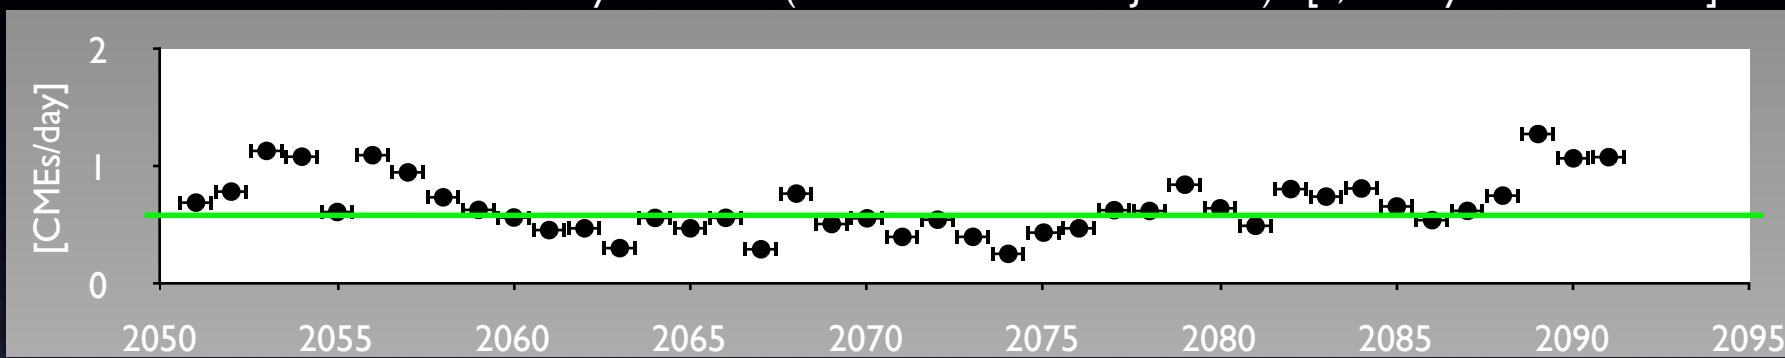

SOHO LASCO
CME Rate in
1996-1997 was
~0.5 CMEs/day

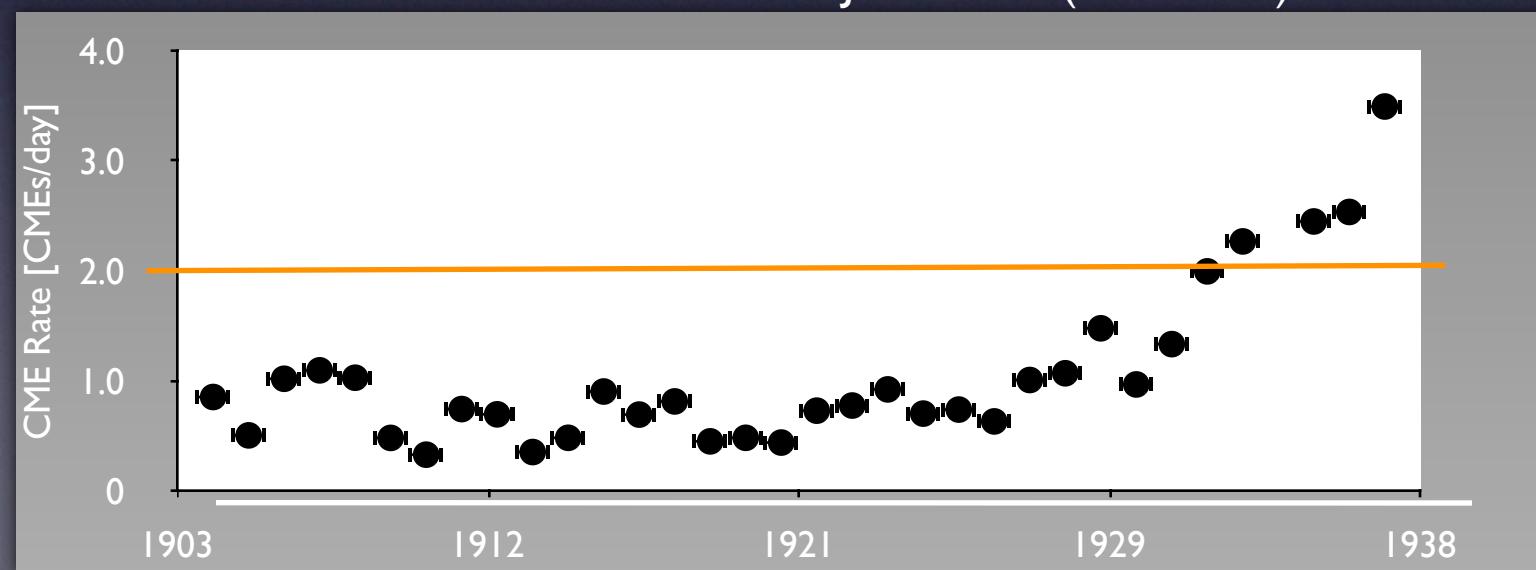

STEREO and SOHO CME Rates

STEREO COR1 Preliminary CME Rate (12-Dec-2006 -to- 03-Jan-2010) [1,059 days ==>577 CMEs]

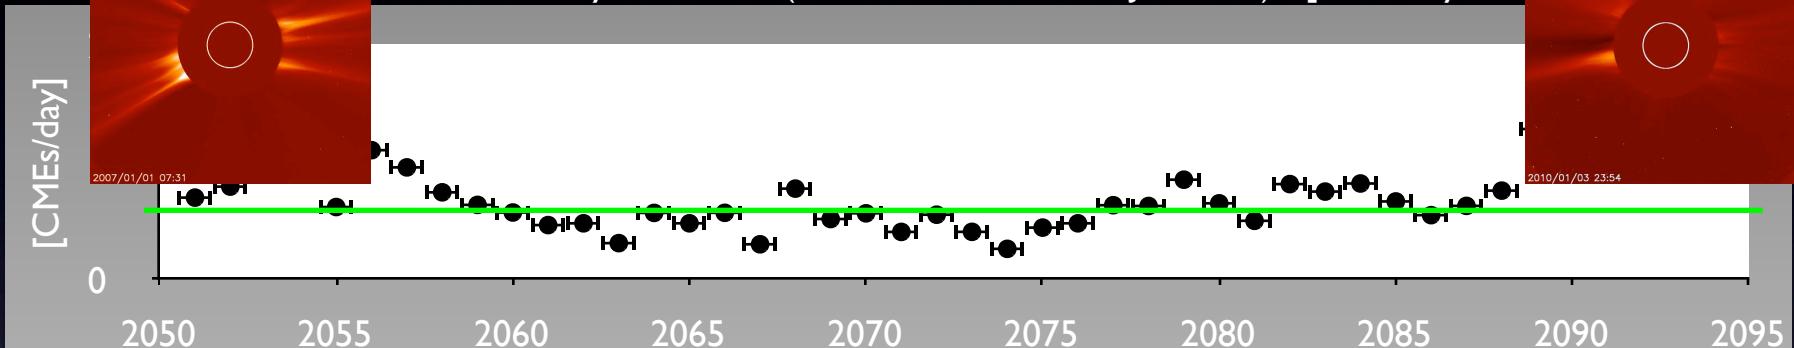

Carrington Rotation
SOHO-LASCO 1996-1997-June 1998 (841 CMEs)

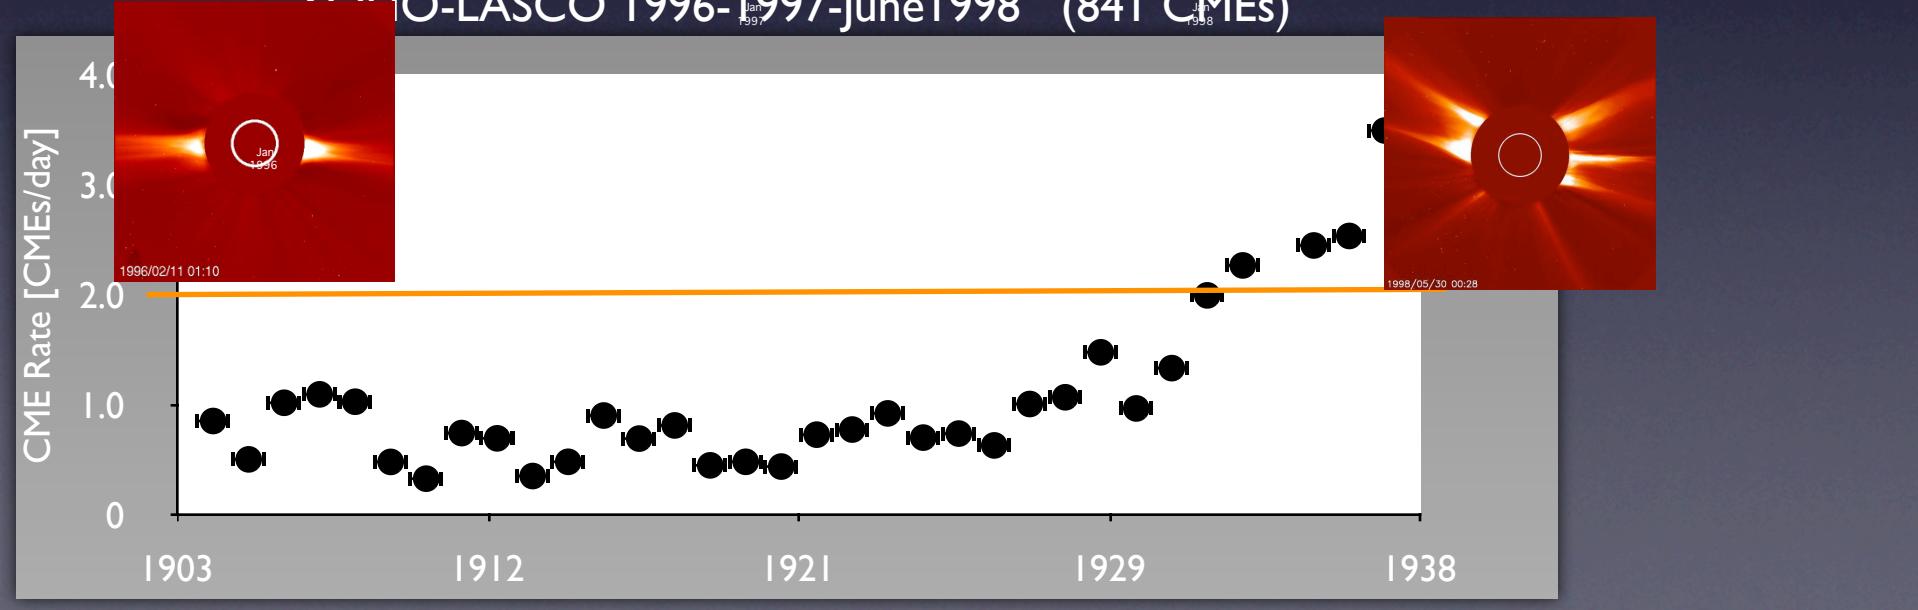

Coronal Morphology (from SOHO)

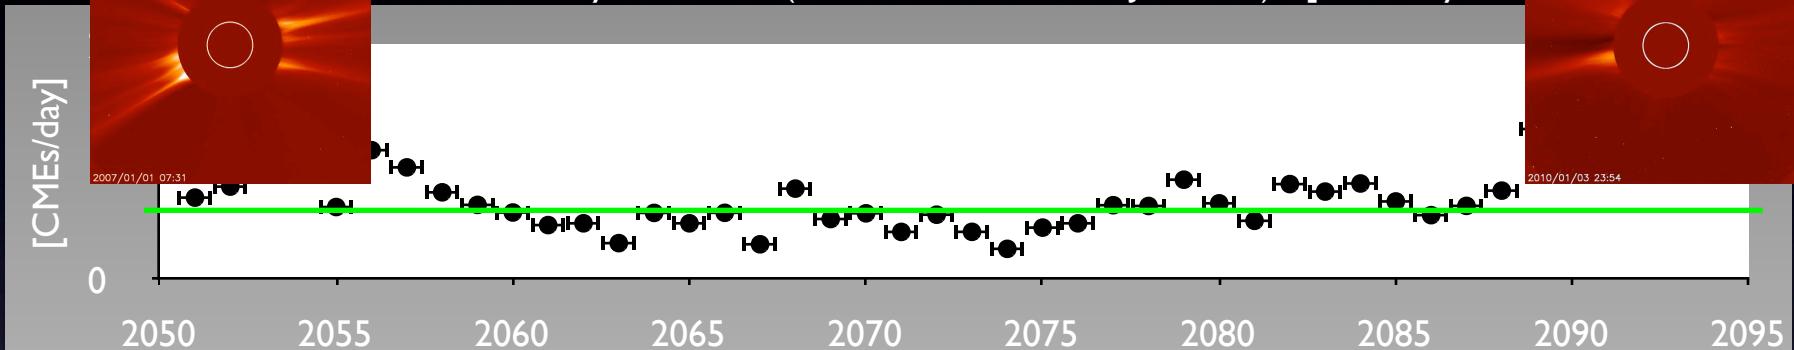

CARRINGTON ROTATION
SOHO-LASCO 1996-1997-JUNE 1998 (841 CMEs)

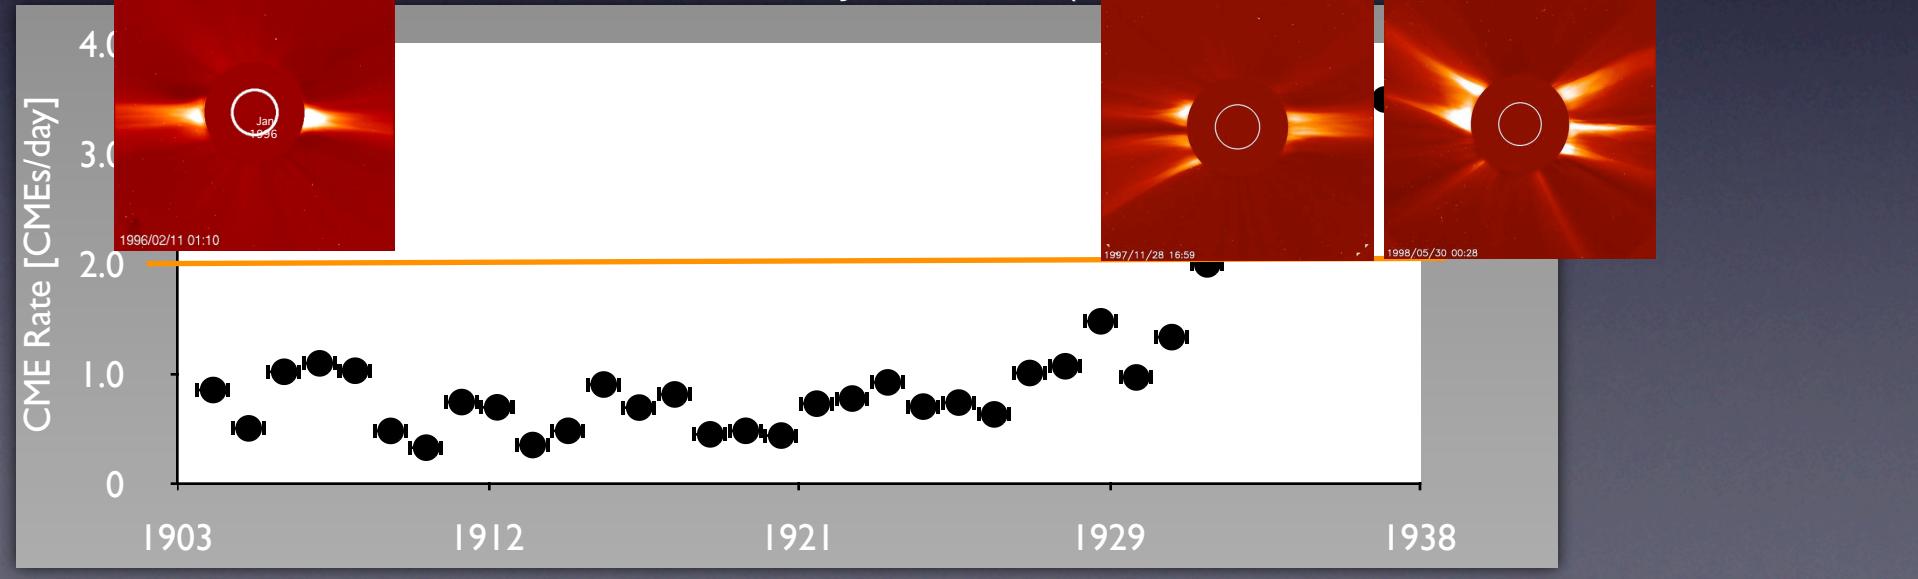

Coronal Morphology (from SOHO)

CARRINGTON ROTATION
SOHO-LASCO 1996-1997-June 1998 (841 CMEs)

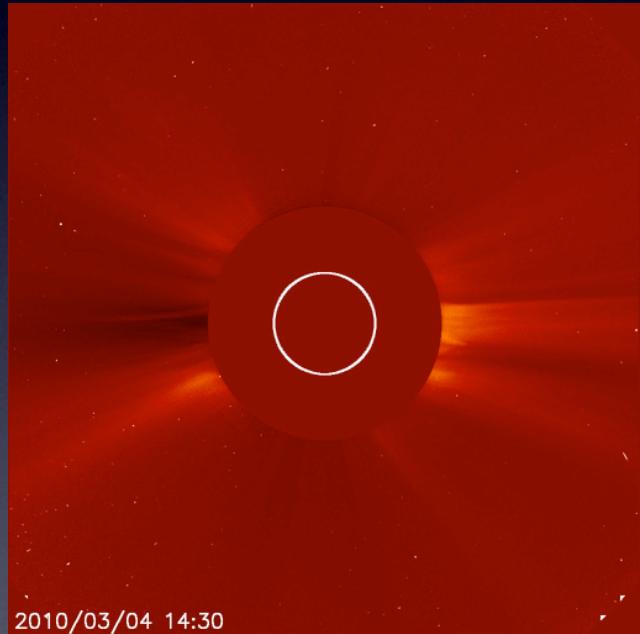

Summary

NOAA/NASA Solar Cycle
24 Panel predicts a smaller
and later maximum

CR-averaged CME rate has
recently risen above $\sim 0.5/$
day, but the slope appears
more shallow than in 1998

Summary

NOAA/NASA Solar Cycle 24 Panel predicts a smaller and later maximum

CR-averaged CME rate has recently risen above $\sim 0.5/\text{day}$, but the slope appears more shallow than in 1998
